Dear colleagues,

For the third year, our conference is enriched by new speakers and guests by whom we accomplish better scientific presentations. The target of our conference is to enlighten scientific topics which are in question.

Particularly, *Face III & Figure* conference goal is to demonstrate the new techniques and methods in aesthetic facial plastic surgery in addition to aesthetic body sculpture surgeries (new this year).

Published papers and lectures are not as efficient as live surgeries. We will have the opportunity to show you live cases and procedures done by the invited professors which are going to answer any possible questions that may occur.

The way of organization of the conference will allow the unlimited number of participants to interact with the speakers. There will be an open discussion in order for you to feel comfortable and confident to apply the suggested techniques and operations immediately after the congress.

In conclusion, please find some time to enjoy the beautiful sightseeing in the beautiful Sahl-Hashesh in Hurghada as you will definitely enjoy the Resort “**CITADEL AZUR**”

I am looking forward to welcoming you.
