Plastic surgery is an innovative field that released many ideas throughout time. The real destiny for any idea is to rise, decline or standstill. In our meeting, an interactive session that will discuss how old ideas and innovations react against new thoughts. It is not a battle to prove or disprove. It will be hopefully a trial to throw a stone in still water.

Tackled Topics

- Reconstructive surgery, ladder vs elevator.
- Aesthetic considerations in reconstructive surgery.
- Aesthetic surgery outcome, an expression that differ from time to time.
- Regenerative concepts, do it affect decision philosophy?
- Authors looking from the past are they still happy of what they introduced.
- Plastic Surgery practice looking forwards 50 years.
